GEORGIA SOLAR ENERGY ASSOCIATION

# Annual Membership and Sponsorship Opportunities

**The Georgia Solar Energy Association (GA Solar) supports the development of a robust solar industry in Georgia through advocacy, education and outreach.** Since inception in 2002, we have developed programs and promoted policies that support the implementation of solar throughout the state. Current and recent accomplishments include::

- **Served among lead solar industry consultants** to develop Georgia Power's Advanced Solar Initiative (GPASI) program, which will create 210 megawatts of installed solar capacity by the end of 2015.
- **Reserved 90 megawatts of planned solar development** under the GPASI for small and medium-scale distributed generation projects.
- **Provided testimony to the Environmental Protection Agency** on the role solar energy can play in helping Georgia meet carbon-reduction goals.
- **Established the annual Southern Solar Summit** as the premiere regional showcase for solar industry information and policy.
- **Provide policy information** and updates to members and sponsors.
- **Serve as the go-to resource** for media on the solar outlook in Georgia.

Annual events we host include the **Southern Solar Summit**, an **awards ceremony holiday party** and the ever-popular **Solar Swings golf outing**. In addition, we host **quarterly member meetings** as well as other events around the state. All of these are opportunities for members to socialize, promote business-to-business networking and to stay informed of local news.

**We depend on membership and sponsorship contributions to make our work possible.**

We invite you to review our list of opportunities for partnering with Georgia Solar Energy Association. Please see [page two](#) for a full list of annual corporate membership and sponsorship opportunities and [page three](#) for a list of individual membership options.
